### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, are drawn to processing caller profiles and their distribution. In particular the processing involves authentication, verifying and networking classified in class 379, subclasses 88.02, 88.12, 211.02, 212.01, 265.01, 265.02 and 265.12.
  - II. Claims 13-25, are drawn to recording of caller information and placing callers on hold. The recording and holding are classified in class 379, subclasses 68, 85, 88.25-88.28, 162, 201.01-201.05, 201.12, 265.03, 265.06 and 265.08.
  - III. Claims 26-44, are drawn to placing callers in queues. In particular the callers positions in the queues are adjusted based on parameters. These claims are classified in class 379, subclasses 209.01-210.01, 265.12-265.14, 266.01-266.04.
  - IV. Claims 45-50 are sub-combinations of groups II and III.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the disclosure teaches that they can be operated independent of each other. For example, in Invention I, callers requests are processed based on authentication

Art Unit: 2645

and verification alone (page 13, lines 5-15). In invention II the calls are processed based on recorded caller profiles which are used to place calls on hold (Page 23, lines 5-10 and Page 26, lines 5-15). In invention III, calls are processed when they are in a queue (Page 25, lines 15-25). Invention IV is a sub-combination of Inventions II and III.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and subject matter, the search required for each invention is not required for the other. Therefore, restriction for examination purposes as indicated above is proper. See MPEP 806.05 (d).

4. A telephone call was made to Applicants representative, **Mark Walker**, to request an oral election to the above restriction requirement. No election was made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
